

### THE LEGEND

On the way to SIA "Unguri" and peat production let's make a stop in Sigulda and learn why it's so special.  
**As the slogan of Sigulda proposes - Breathe Freely!**

In SIA "Unguri" visitors will have opportunity to visit peat extraction site near Cēsis and to see peat machinery used to prepare peat fields, drainage, peat harvesting equipment and peat transportation solutions.

### THE LOCATION

**SIGULDA** is one of Latvia's most beautiful cities. There are not many places in the world where the beauty of nature becomes an integral part of the city. This picturesque town does not have great industries, but it has hills for skiing in the winter and winding roads along which one can ride bicycle in the summer.

Located 92 km from Riga, Unguri Mire is providing it's underground treasure – the peat. SIA "Unguri" (Ltd "Unguri") is exporting peat worldwide. It is one of the main peat exporters in Latvia.

### THE CONCEPT

This trip will include plenty of nature sights not only in the town itself but also on the way. The reason is the location of the town – right in the heart of the Gauja National Park, the biggest National park in Latvia. Due to the hilly region this town is often referred to as the "Latvian Switzerland".

Before the way to technique demonstration you will stop by a favorite local restaurant "Kungu Rija" to enjoy a nice meal and a bit more of the beautiful nature.

In SIA "Unguri" you will have the possibility to see technique demonstrations in the field weather permitted, discuss newest methods and exchange experience. Visitors will have the possibility to enjoy area and discuss methods used around the globe!
